

The procedures available on the Transmille web site are a cost option, based on a WEB CREDIT rating (based on procedure complexity / time required to create). To subscribe to this service, you should contact Transmille (or authorised agent) and order multiples of 20 credits – see latest software price list for details on cost.

APPLYING FOR & SETTING UP PROCEDURE DOWNLOAD SERVICE

WEB Procedure service subscription should be activated on the designated computer which will be used to import the procedures (any NETWORKED computer can be used for this purpose)

- Ensure the PC is already configured to link to the network server (if using a network system) before using the procedure download service

To apply for the Licence Number to activate the WEB procedure subscription follow the steps below :

STEP 1

- ▶ Start up ProEdit, then choose **Help → Setup WEB Service**

STEP 2

- ▶ The WEB subscriber service screen will be shown. To activate the system you will need the **Install Ref** number displayed. A fax-back form can be printed for convenience which allows application details to be entered, alternatively email this number to software@transmille.com

A screenshot of the 'Setup WEB Procedure Subscriber Service' screen in ProEdit. The title bar reads 'PROEDIT PROCEDURE MANAGEMENT SOFTWARE'. Below the title bar, it says 'V4.09 : 03/12/2009'. The main content area is titled 'Setup WEB Procedure Subscriber Service'. It displays 'Install Ref. 9444' in large red text. To the right of this is a 'Print Application Form' button. Below this, there is a text box for 'Registration Key' and 'Cancel' and 'O.K.' buttons. A 'Current Status' panel on the right shows 'Web Procedure Subscription Service Is Currently : *** INACTIVE'. At the bottom, there is a footer with contact information: 'TRANSMILLE LTD • +44 (0) 1580 890700 • EMail : software@transmille.com • Web : www.transmille.com'.

Click here to view the Fax Back form. This can be printed out for faxing.

Panel displays web service status. This can be viewed at any time to check credit level.

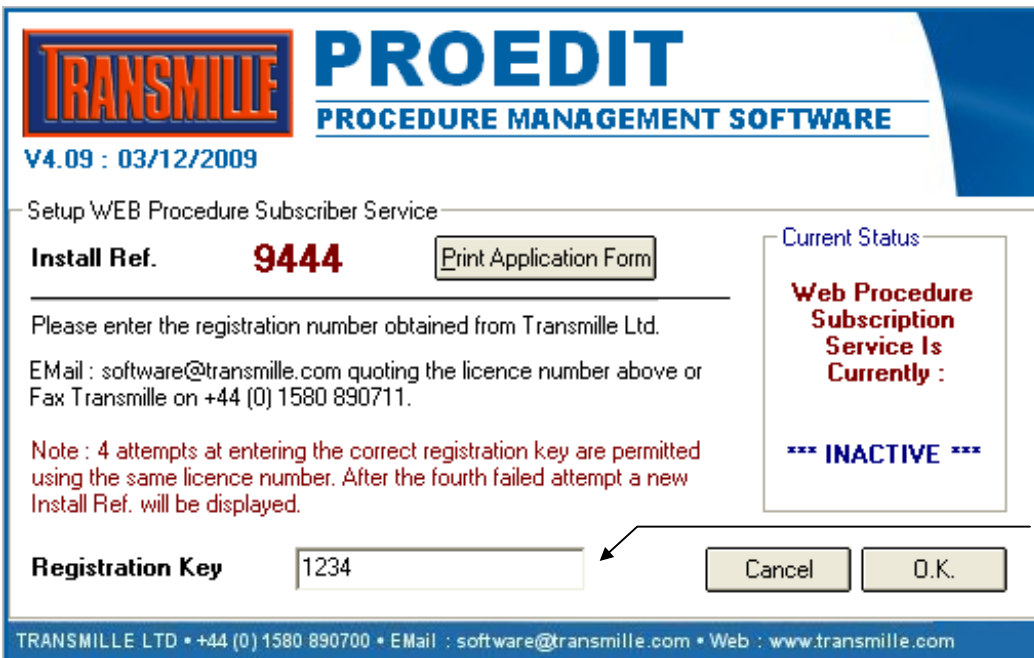

STEP 3

On receipt of the **Registration Key** from Transmille, this needs to be entered into ProEdit.

- ▶ Start up ProEdit, then choose **Help → Setup WEB Service**

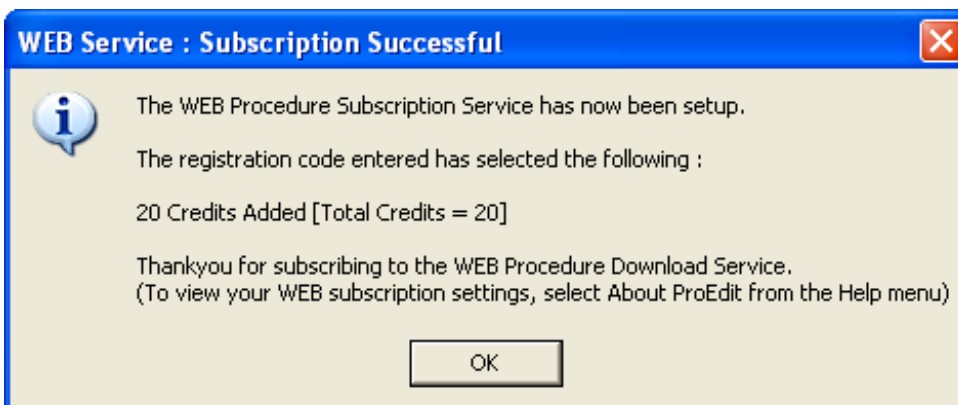

- ▶ Enter the Licence Number in the box provided and click OK.

Enter registration key here, then press OK

You should see a message similar to the one displayed below, indicating the number of credits added (and the total overall).

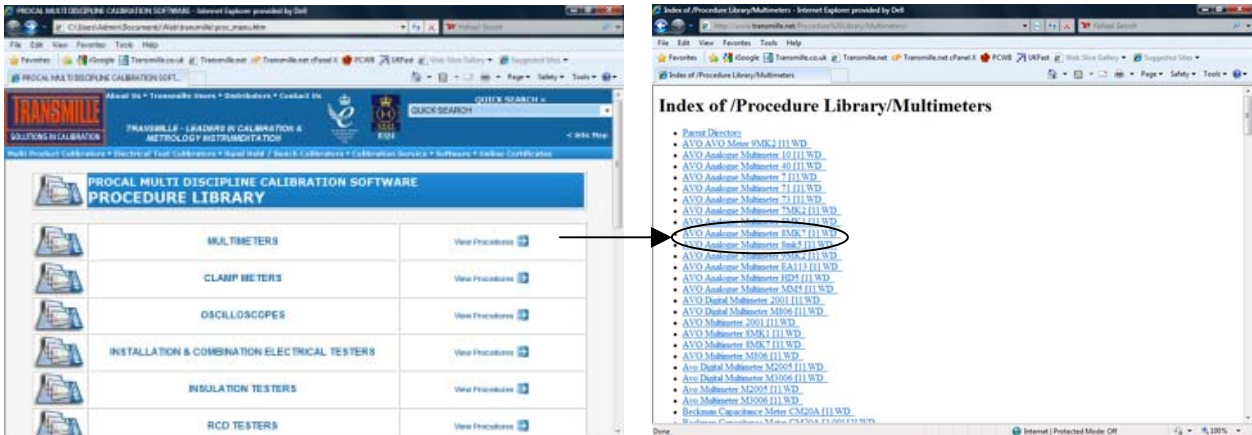

- ▶ Note : It is possible to buy credits to 'top up' your current credit total.

USING THE PROCEDURE DOWNLOAD SERVICE

Procedures can be downloaded from www.transmille.com/proc_menu.htm

STEP 1

Select one or more procedures and download by clicking on the section required, then clicking on the procedure required. Note, to aid searching of a model number select the **EDIT** menu of the web browser and select **FIND ON THIS PAGE**.

Choose **SAVE TO DISK** and save the file to your computer.

At this point there are no restrictions to the number of procedures you can download – the restriction will apply when you **IMPORT WEB PROCEDURES** using ProEdit.

When you have downloaded all the procedures you require from the web site proceed to step 2.

STEP 2

- ▶ Start up ProEdit, then choose **Utilities** → **Import Web Procedures**
(Note : If no credits are available, this menu item will be disabled)

Please note the **IMPORT WEB PROCEDURES** function is different to the normal **IMPORT PROCEDURES** function.

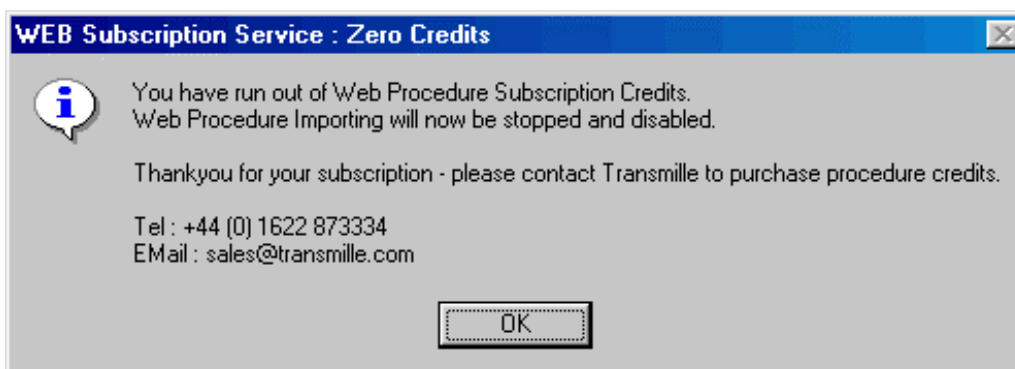

The following dialog will appear – select the location the downloaded procedures were stored to and they will be listed in the right hand list of the dialog.

Select the specific files required to be imported, or leave selection blank to import all files in this location. Click OK and importing will begin.

If all procedures are successfully imported, the message, left, will be displayed :

If the number of credits required were not available (e.g. credits reached zero during importing) then a message similar to the message, left, will be displayed.

STEP 3

Once all importing has been completed, simply use the normal **Edit An Existing Procedure** function to view the newly imported procedures.
